PROFESSIONAL SUMMARY

Technical support professional with 4+ years resolving hardware, software, identity, and connectivity issues in high-volume, HIPAA-regulated call center environments — including direct enterprise support of CVS Health's workforce on the Alorica contract. Experienced across Windows 10/11, iOS, macOS, Android, printers and peripherals, and enterprise applications (Epic, NextGen EHR). 98%+ customer satisfaction across Tier 1-2 roles, with a track record of first-call resolution, root cause analysis, and documentation that cuts repeat tickets.

CORE COMPETENCIES

Hardware, Printer & Peripheral Troubleshooting	Windows, iOS, macOS & Android Device Support
Tier 1-2 Help Desk & High-Volume Call Queues	First-Call Resolution & Clear Step-by-Step Guidance
Active Directory, Entra ID & Account Management	MFA / SSO Support for EHR Systems (Epic, NextGen)
Incident Documentation (ServiceNow / Jira)	Root Cause Analysis & Knowledge Base Authoring
HIPAA-Compliant IT Environments	Remote Desktop & VPN Connectivity Support

CERTIFICATIONS & EDUCATION

CompTIA Security+ — In Progress	Expected 2026
Google Healthcare IT Support Certificate — Johns Hopkins University (Virtual)	02/2026
Google Cybersecurity Professional Certificate — Google (Virtual)	12/2025

PROFESSIONAL EXPERIENCE

Cyber GRC Intern | Skillweed | Lubbock, TX 01/2026 – 03/2026

Applied IT risk and compliance frameworks in an enterprise environment, supporting security operations and documentation.

- Mapped NIST CSF 2.0 controls to organizational security policies, identifying gaps in IT risk posture across infrastructure and endpoint domains.
- Drafted SBAR reports and security awareness training materials, communicating technical findings to non-technical stakeholders.
- Conducted third-party vendor risk evaluations and supported audit-readiness through structured evidence collection.

IT Systems & Identity Administrator | Alorica — CVS Health Contract | Remote 11/2024 – 12/2025

Remote enterprise IT support for 500+ CVS Health representatives — identity, device, and application issues in a regulated healthcare environment.

- Resolved access failures, connectivity issues, and EHR application errors for 500+ users across multiple time zones — often under patient-impacting time pressure.
- Configured MFA and SSO for Epic and NextGen EHR systems, guiding non-technical users through setup with clear step-by-step communication.
- Performed root cause analysis on authentication and connectivity failures; authored After-Action Reports that identified systemic causes and reduced repeat tickets.
- Enforced change management and audit-ready documentation for all account modifications in a HIPAA-regulated environment.

IT Help Desk Specialist | AT&T | Lubbock, TX 09/2022 – 10/2024

Tier 2 technical support for 100+ representatives in a high-volume call center — 98% customer satisfaction rating.

- Diagnosed hardware, software, network, and application failures across Windows 10 endpoints, smartphones, printers, and peripherals for 100+ active users.
- Managed Active Directory accounts — provisioning, password resets, MFA setup — ensuring fast, secure access to enterprise CRM systems.
- Documented 50+ monthly incidents in ServiceNow/Jira and authored knowledge base articles that improved team resolution efficiency by 20% and cut repeat ticket volume.

TECHNICAL LAB PROJECTS (HOME LAB — DOCUMENTED AT ELAZARF123.GITHUB.IO/CYBER-PORT)

- **Enterprise AD Lab** — Built a 3-VM Active Directory domain (Server 2019 DC + clients): OU design, GPO policy chains, DNS/DHCP with SRV records, replication health monitoring with repadmin/dcdiag.
- **Microsoft 365 Sandbox** — Administer a 25-seat E5 tenant: Conditional Access with MFA, Exchange mail flow rules, SPF/DKIM/DMARC, SSPR, and group-based licensing.
- **PowerShell Automation Suite** — Published reusable scripts on GitHub: bulk user provisioning from CSV with error handling, 90-day stale account detection, and recursive privileged-group audits.
